

Element Web Administrator Form

Paracel Laboratories Ltd. is pleased to provide online web access to our database which enables our clients to access their data via the Internet. This form will designate an Administrator for your company. This person's responsibilities will include informing Paracel of any new user registrations or deletions to be made to Element Web, managing requests and information in regards to Element Web and acting as a point of contact in your office. By appointing one point of contact within your company, we believe this will enable Paracel to maintain better security to the site by limiting user information distribution and we appreciate your assistance with this protocol.
